

With Eight Arms.

Liko™ OctoStretch™ is intended for the lifting and transfer of patients in a horizontal position. The normal areas of use are surgery wards but also in intensive care wards and X-ray departments. The weight-bearing section comprises a complete liftsheet or, alternatively, four or five lift straps. Liko™ OctoStretch™ is known for its user-friendliness and relative compactness both when in use and when parked. It is available with Liko™ Stretch Leveller™, making it easy to adjust the centre of gravity during the lift.

Liko™ OctoStretch™ can be used together with the overhead lifts Likorall™ and Multirall™, as well as mobile lifts Viking™ M and Golvo™.

Important features

- Easy to use
- Compact
- Available with Stretch Leveller for optimal balancing
- Complete LiftSheet or Lift Straps as accessories

Accessories.

Quick-Release Hook

If the patient lift and Liko™ OctoStretch™ are equipped with a Quick-Release Hook, the stretcher can be assembled easily as the need arises, without the use of tools. Liko™ OctoStretch™ can also be combined with LikoScale™ to weigh patients while lifting them.

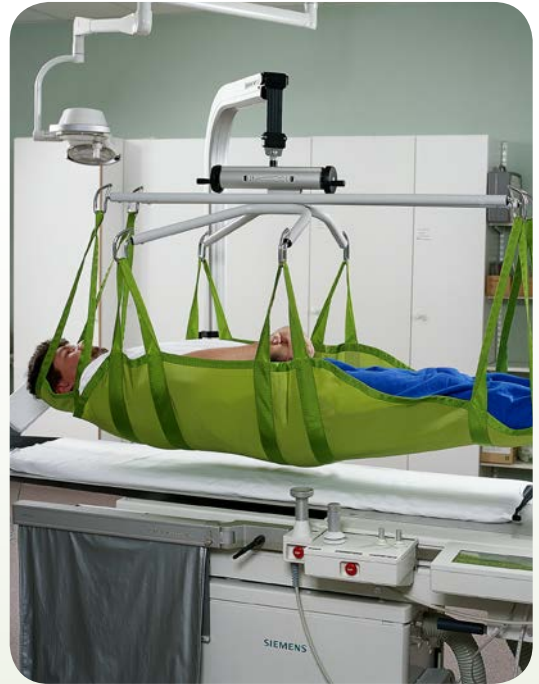

Stretch Leveller

When the lift is equipped with Liko™ Stretch Leveller™ you can easily adjust the lifting so that the patient lies either horizontally or with the head end slightly raised.

Liftsheets/lift straps

Liftsheets are available in two sizes and types of material. Lift straps are also available in two variants and types of material.

The patient is easily transferred from bed to examination table.

Max. Load: 200 kg (440 lbs)
