

Measure your child	Choose the appropriate seat size	Consider your child's strength			Choose gas strut kit
 <p>Back height</p>					
		Able to activate the dynamic movement	Too easy to activate the dynamic movement	Can't activate the dynamic movement	Weak = 50 N (8911050)
		Standard gas strut = 100 N is sufficient	Choose a stronger gas strut = 150 N	Choose a weaker gas strut = 50 N	Standard = 100 N (8911100)
Back height = 27-37 cm	x:panda 1 (891011x-01)				Strong = 150 N (8911125)
Measure your child	Choose the appropriate seat size	Consider your child's strength			Choose gas strut kit
 <p>Back height</p>					
		Able to activate the dynamic movement	Too easy to activate the dynamic movement	Can't activate the dynamic movement	Weak = 50 N (8911050)
		Standard gas strut = 100 N is sufficient	Choose a stronger gas strut = 150 N	Choose a weaker gas strut = 50 N	Standard = 100 N (8911100)
Back height = 32-42 cm	x:panda 2 (891012x-01)				Strong = 150 N (8911125)
Measure your child	Choose the appropriate seat size	Consider your child's strength			Choose gas strut kit
 <p>Back height</p>					
		Able to activate the dynamic movement	Too easy to activate the dynamic movement	Much too easy to activate the dynamic movement	Weak = 150 N (8911150)
		Standard gas strut = 150 N is sufficient	Choose a stronger gas strut = 250 N	Choose an even stronger gas strut = 300 N	Standard = 250 N (8911250)
Back height = 35-47 cm	x:panda 3 (891013x-01)				Strong = 300 N (8911300)
Measure your child	Choose the appropriate seat size	Consider your child's strength			Choose gas strut kit
 <p>Back height</p>					
		Able to activate the dynamic movement	Too easy to activate the dynamic movement	Much too easy to activate the dynamic movement	Standard = 350 N (8911350-4)
		Standard gas strut = 350 N is sufficient	Choose a stronger gas strut = 450 N	Choose an even stronger gas strut = 550 N	Strong = 450 N (special order)
Back height = 49-68 cm	x:panda 4 (891014x-01)				Stronger = 550 N (special order)
