

SELECT – making
daily care easier

SELECT

Function and design from top to bottom

Assistive daily care equipment is not what it used to be. It has improved dramatically. While functionality is the highest priority, it is still important for the design to be attractive and inviting.

Pressalit Care focuses on making daily life easy for users and carers, taking into account all usage situations, safety and hygiene, without compromising on design or atmosphere.

Since users and carers will use the products every day, it is important that they blend in as natural and attractive elements of modern interiors, while still serving as a work tool.

Pressalit Care SELECT is a series of lifters for toilets and wash basins. The series includes manual and electric toilet lifters and electric wash basin lifters with various modes of operation – and all the associated accessories.

Respect for people and their right to a good life irrespective of their functional ability is the cornerstone of Pressalit Care's philosophy. This is summed up in two words:

keep living

Toilet lifters

with electric or manual operation

The aim is to make it as easy as possible for users to get on and off the toilet during daily use. The aim is also to make the carer's work easier, and make the process comfortable and dignified for the user. We ensure good hygiene by making cleaning easier. But creating an attractive and inviting environment is also key. Pressalit Care's toilet lifters are available with manual and electric operation, and can be combined with support arms, flush buttons and all the other equipment which makes toileting easy, safe and hygienic.

● Rounded corners and edges make cleaning quick and easy – there are no concealed edges or holes where dirt can hide.

● Toilet lifters are available in three different colours which all harmonise with modern bathrooms, resulting in a comfortable and inviting toilet environment.

● The toilet lifter comes with a standard operating panel. Accessories such as electric flush buttons and a toilet roll holder can be fitted on the support arm.

● The toilet lifter is available with a wired hand control which makes it easy for the user or carer to adjust the height.

● Seat height can be adjusted a full 400 mm from 425 to 825 mm – even while the user is sitting on the toilet.

The toilet lifter has been tested and approved for a load of up to 200 kg.

Powered toilet lifters

P. 14-21

Powered toilet lifters

– Supplied with side profiles for support arms and cistern, incl. 3/6 l dual flush

- ◀ **R8312xxx** 400 mm height adjustable for floor outlet
- R8322xxx** 400 mm height adjustable for wall outlet

Powered toilet lifters

– Supplied incl. cistern with 3/6 l dual flush

- ◀ **R8212xxx** 400 mm height adjustable for floor outlet
- R8222xxx** 400 mm height adjustable for wall outlet

○ 000 White ● 112 Anthracite ● 277 Lime green

Max. load:

200 kg

● The toilet can be raised and lowered using the crank handle. The crank handle can be moved to the other side of the lifter – without the need for tools.

It is possible to adjust the height of the toilet lifter using an electric drill as an alternative to the crank handle.

● A minimum of grooves, slots and holes makes cleaning fast and effective, and also results in an attractive and exclusive design.

● The toilet can be adjusted 300 mm, from 425 mm to 725 mm in height, so the height can always be perfectly matched to mobility aids such as a wheelchair.

Manual toilet lifters

P. 14-21

Manual toilet lifters

– Supplied with side profiles for support arms and cistern, incl. 3/6 l dual flush

R8112xxx

Reduced functionality need not limit a person's development. For more than 35 years, the keep living philosophy has been a guiding principle for Pressalit Care's development of flexible kitchen and bathroom solutions for people with disabilities.

Thanks to its research-based knowledge, Pressalit Care is a market leader within specialist kitchen and bathroom solutions and today provides consultancy to customers worldwide.

An underlying respect for the individual and his or her possibilities is also reflected in the company's relationship to society at large and the local community. At Pressalit, Corporate Social Responsibility (CSR) is deeply rooted in the company's strategy and values and guides all parts of the organisation

Pressalit Care's head office is located in Denmark.
