

PRESSALIT®

## Shower and changing tables

Pressalit's shower and changing tables have been designed to provide a secure and stable surface for children and adults. Most of our shower and changing tables are suitable for use in showers. Either way, wet or dry use, our shower and changing tables will help create a comfortable bathroom environment for users and carers alike.

## A safe solution with people in mind

One in every five people in the world live with some form of disability, which makes disabled people one of the world's largest minority groups. In many cases, the needs of the disabled continue to be overlooked when they visit schools, institutions, hospitals and public facilities, and anywhere where toilet conditions can be either unaccommodating or inappropriate.

### **Make room for dignity**

Profoundly disabled people and the families of disabled people often find that a simple trip out, to a theme park for example, quickly becomes a humiliating and undignified experience, or even impossible because the toilet facilities don't meet their needs.

Inadequately equipped toilets can also mean that some choose, for example, not to drink anything before a day out, while others are forced to lie on an unhygienic toilet floor or resort to being changed in the boot of the car. This is not a dignified situation for anyone, which is why

changing tables should be installed in toilets to improve accessibility to public places. When shower and changing tables are used in the home, they improve the general well-being and the quality of life for users and carers on a day-to-day basis.

### **High level of safety for both users and carers**

Safe and comfortable working conditions are essential for both carers and the people they are looking after. The hazards of a poorly equipped bathroom become more obvious as children grow into adulthood. Inappropriate lifting and incorrect working heights can cause back pain and injury and therefore present a safety risk to both the carer and the person being cared for.

These challenges can be resolved with height adjustable shower and changing tables. The height of the table can be adjusted to assist transfers from mobility and lifting equipment. Additionally, table heights can be set in the correct position for carers, thereby helping reduce the risk of injury.

**Easy cleaning and optimum hygiene**

Thorough cleaning of a bathroom or toilet to maintain optimum hygiene should be quick and easy. That's why Pressalit's shower and changing tables are designed in materials that put hygiene first. This makes our shower and changing tables ideal for hospitals and public institutions, as well as private homes.

**Flexibility and quality go hand-in-hand**

Having the right facilities in the bathroom helps increase the experience of independence and dignity for bathroom users. The higher level of self-sufficiency also helps increase their quality of life.

Different features allow you to adapt each shower and changing table to the individual room and user needs. All shower and changing tables also come with a 3-year warranty - ensuring the peace of mind that comes with a durable solution of excellent quality.

design

” Welfare technology such as this not only helps increase quality of life for users, but also contributes to a healthier working environment for relatives and care staff .

*Holger S e Plougsgaard, Product Development Manager at Pressalit*

# PITTSBURGH INTERNATIONAL AIRPORT

## Becomes all accessible

In a first for airports around the world, Pittsburgh International Airport has introduced a dedicated facility to help reduce stress for travellers with sensory sensitivity and their families. Here, those with autism or similar issues and their families can de-escalate prior to take-off and after landing. In addition, the Pittsburgh International Airport has introduced Pressalit products to improve accessibility in the terminal's 'family restroom'.

They have installed a Pressalit height-adjustable washbasin and height-adjustable adult-sized changing table. This makes it easier for families to travel comfortably, regardless of physical or mental ability.

” It is so important to make sure that I am not injuring my family members or my husband when they are trying to make sure that my needs are taken care of. The safety of both me and the care provider is vital and that is one reason the height adjustable tables are so important.”

*Dr. Josie Badger, diagnosed with congenital myasthenic syndrome*

### **Facilities to meet the needs of the community**

Nothing was left to chance when the Pittsburgh International Airport began the process of making the airport more accessible. This was a strong commitment to establish facilities that meet the needs of the entire community. The airport consulted with advocacy groups, caregivers of children with neurodevelopmental challenges, and other individuals possessing valuable insight.

This consultative process collected experiences and suggestions for the design of the sensory room and the 'family restroom'. It became clear that one of the most important items for users in the 'family restroom' is the availability of an adult-sized changing table – and that it is height-adjustable. This improves the safety of use and eases the transfer from wheelchair to changing table. Travellers with disabilities would now have the dignity and privacy they need when visiting the airport.

### **A better travel experience**

Many families impacted by a disability do not fly long distance – in fact many do not fly at all. One reason for this is the lack of accessible facilities in accessible bathrooms. The installation of a Pressalit adult-sized changing table and height-adjustable washbasin is a major step to improve restroom accessibility. The impact is substantial. More people than expected use the changing table and the height-adjustable washbasin. This improves the airport experience for visitors. Travellers have less stress and are more comfortable. This makes the flight more relaxing for everyone.

## PRESSALIT SUPPORTS UNITED NATIONS GLOBAL GOALS AND UNICEF

## PREMIUM BATHROOM SOLUTIONS SINCE 1954

Pressalit A/S is a Danish privately owned company with production facilities in Ry, Denmark. Since 1954, we have been designing and producing toilet seats of the highest quality. And since 1975, Pressalit has also been developing accessible bathrooms and height-adjustable kitchens for people with reduced mobility. This has made us one of the world's leading manufacturers of premium bathroom solutions. High quality, flawless design and reliable functionality are the core features of our wide range of products.
