

1 | SWITCH ON THE WALL MOUNTED CONTROL UNIT

If the control unit is switched off, turn the key **A** clockwise.

2 | CALL THE LIFT

Press the Up or Down button **B** until the lift stops automatically.

3 | OPEN THE PLATFORM

Press the Open Platform button **C** until the platform and the security barriers are fully open and automatic to stop. By turning the key **A** counterclockwise switch off the wall switch.

4 | DRIVE ONTO THE PLATFORM

5 | DRIVE TO THE STOP

Press the Up or Down button **E** on the lift until you are at the desired stop.

6 | LEAVE THE PLATFORM

7 | CLOSE THE PLATFORM

If the wall mounted control unit is switched off, turn key **A** clockwise. Press the Close Platform button **D** until the platform is completely closed.

8 | SWITCH OFF THE WALL MOUNTED CONTROL UNIT

Turn the key **A** counterclockwise to switch off the control unit.

If you hear a warning signal, the platform is not in the stop. Drive the lift to the next stop by pressing the Up or Down button **B**.
