

Liko™ Multirall™ 200

An overhead lift for flexible needs

In care environments such as hospitals and nursing homes lifting needs may vary, depending on the mobility of the patient. A portable overhead lift can provide a good alternative to a mobile lift. Multirall offers a cost-effective portable lifting solution. It can also be used to transfer a patient between rooms in a sitting position, easily moving from one rail system to another with the use of a room-to-room strap.

Features and benefits

Can be mounted two ways:

1. With the strap below the lift motor, for more stationary use
2. With the strap above the lift motor, for more mobile use

The **Adapter MR/LR** offers a **safe and easy-to-use interface** between the Multirall and the Carriage Hook MR/LR, regardless of which way it is mounted

Easy to move with the optional Extension Arm Adapter MR, no tools needed

Large handles on both sides of the motor facilitate **easy transport**

Can be used with all Liko rail systems, including FreeSpan™, the free-standing option

An extensive assortment of accessories is available including slings, slingbars, scales and the Multirall Trolley

Liko Multirall 200

Technical Specifications

Safe Working Load	200 kg
Lift motor weight	8.7 kg
Slingbar options	Mini slingbar 220, Universal slingbar 350, Universal 450, Universal 600, Universal TwinBar 670, Crossbar
Slingbar connections	Quick-Release
